

Wood Pen Care Instructions

Your wood pen from DK's Wooden Expressions is made from a wide selection of natural woods. Your wood pen should be treated and cared for like any other fine piece of furniture. The woods chosen are of the finest quality and are very stable woods. Your wood pen should not crack under normal circumstances, but it will not tolerate abuse.

- DO NOT leave your pen exposed to extreme temperatures or moisture. Do not leave in car.
- DO NOT use any water, household cleaning fluids and/or any abrasive substances(car wax) on any part of your wooden pen. The fluids and/or abrasives will damage the fine finish on your pen.
- DO care for your fine writing instrument the way you would any fine wood furniture. Protect it occasionally with a light coat of good furniture paste wax designed for wood products, especially if you feel your finish is dulling. Apply paste wax per instructions and clean with a soft, clean cloth.
- DO keep your pen away from extreme temperatures both hot and cold, both are enemies of wood. Protect your pen and it will deliver years of faithful service.
